#### Features and Benefits

The PRO<sup>3</sup> Top Mount packaged refrigeration systems combine evaporator and condensing unit into one unit — simplifying installation and reducing refrigerant charge, which saves time, money and energy. Not only that, it's environmentally friendly.

The PRO<sup>3</sup> Top Mount is designed to maximize storage area inside a cooler or freezer and is ideal for small- to medium-sized restaurant and convenience store applications where holding temperature is the primary goal.

If greater pull-down capacity is required, see the PRO<sup>3</sup> Side Mount packaged refrigeration system (model PST).

#### **EASE OF INSTALLATION AND SERVICE**

- Installation takes a fraction of the time required for a split system: no piping or loose components to install, refrigerant is pre-charged at factory and a field superheat adjustment is not required (see installation manual for more information)
- No drain line required: indoor models come with a condensate evaporation pan
- Flexible design allows for multiple installation methods: optimized for indoor use, but outdoor models available with weatherhood installed. Outdoor models also come with: crankcase heater, drain line heater and fan-cycling for head pressure control
- Maximizes storage area in a cooler or freezer: evaporator grill mounts flush on a standard 4" or a recessed 5 1/2" ceiling panel

#### **EASE OF USE**

- System is factory-assembled, evacuated, charged, run-tested and wired; no additional components or refrigerant charging required; most models come with a 26" power cord ready to plug-in
- Controls preset for typical applications: +35° F for coolers, -10° F, for freezers and are easy to adjust (019L6 set for 0° F)

#### **ENERGY EFFICIENT | ENVIRONMENTALLY FRIENDLY**

- Energy Solutions® energy-efficient motors from InterLink™
   Commercial Refrigeration Parts:
  - PSC motors optional in both condensing unit and evaporator section
  - EC motors optional in evaporator section only
- Reduced refrigerant charge: system uses approximately 10 percent\* of refrigerant required for a comparable split system

#### RELIABLE | DURABLE

- System is fully-assembled and quality-tested at the factory
- Electronic control provides accurate temperature control
- Liquid-line filter drier (medium and large cabinet only)
- Two-year parts warranty

Most indoor PRO<sup>3</sup>Top Mount systems come standard with a 26" power cord and 3-prong electrical plug for quick installation and start-up which may eliminate the need for a field installed disconnect. See the data tables in this brochure for electrical receptacle specifications.

The PRO<sup>3</sup> Top Mount evaporator grill sits flush in a standard 4" thick ceiling panel.

MEA Accepted

PRO<sup>3</sup> Top Mount systems are UL-listed in the United States and Canada

<sup>\*</sup> Results may vary. Estimate based on a typical 25-foot refrigerant line length.

#### New EC Motors for PRO3 Top Mount Packaged Refrigeration Systems

Introducing the most energy efficient motor available for packaged refrigeration systems. Choosing energy efficient motors for your packaged systems can provide significant energy savings and lower operational costs. Additionally, because these motors can help reduce heat load (and system run-time), they can improve the reliability and longevity of refrigeration equipment.

**Electronically Commutated (EC) motors** even further improve energy efficiency and equipment reliability. EC motors by InterLink™ are up to 75% efficient – that's a 51-59% increase over shaded pole motors and a 30-35% increase over PSC motors. As with PSC motors, you save money both directly from a decrease in motor watts and also from a reduction of heat gain into the refrigerated space.

**Permanent Split Capacitor (PSC) motors** can significantly lower your energy costs. PSC motors average 30-35% higher efficiency than shaded pole motors and offer dual energy savings by reducing motor watts and heat gain into the refrigerated space.

#### Right source. Right parts. Right now.

### Replacement Parts

Condensing Unit Wrapper InterLink is your link to a complete line of dependable and certified commercial refrigeration parts, accessories and innovative electronic controls for all Bohn equipment. At InterLink, we provide our wholesalers with a comprehensive selection of product solutions and innovative technologies for the installed customer base. And every product is built to ensure the same high performance standards with which all Bohn brands are built backed by a dedicated team to serve every customer need, delivering at the best lead times in the industry.

#### Dependable. Versatile. Courteous.

Finally, one simple source for all your replacement needs from a name you can trust.
