

Floral Coolers

Floral storage coolers and display coolers are two of our specialties here at U.S. Cooler. Our floral coolers are perfect for use by florists, grocery floral departments and convenience stores. They feature refrigeration that holds the temperature constant, the humidity high and the air velocity low, which allows for the proper storage of delicate plants and flowers. Any size, shape or configuration, U.S. Cooler can provide you with a display cooler that will beautifully showcase your floral products. Our floral coolers are a great investment for your business and will perform for many years to come.
