1/2 To 6 HP Indoor & Outdoor Condensing Units

Features & Benefits

Cabinet & Construction

- HyperCore™ microchannel coil technology standard on all units
- Painted steel cabinets for superior strength and corrosion protection
- Heavy duty steel raised base with 1-1/2" legs
- Fan guards and wiring conduit on indoor models

Typical Outdoor Hermetic Unit

Serviceability

- Suction service valves for hermetic and scroll compressors located outside the cabinet for quick installations. Semi-hermetic compressor models have a suction valve on the compressor and an access fitting on the suction line entering the cabinet.
- Receiver with fusible plug, liquid shutoff valve and charging port is standard
- Large electrical panel for ease of access
- Prefabricated wiring harnesses for tight crimp connections and consistent labeling
- Unit stays on if the hood is removed for servicing
- Sight glass is easily viewable

Typical Outdoor Unit with throwaway liquid-line filter and sight glass

Quality

- All units are completely leak tested in a helium environment, bump tested and allowed to cycle off on the high and low pressure control. Each unit has a copy of the run data shipped inside the electrical panel
- Electrical circuits are completely checked for continuity
- Piping is laid out to minimize stress and vibration and is pre-bent to eliminate leaks
- Encapsulated, auto-reset, high and low pressure controls to eliminate leaks (standard on all high and medium temperature models, adjustable low pressure control standard on low temperature models)

Typical Outdoor Hermetic Unit with liquid filter drier and sight glass

Components

Fan

- Specifically matched with motor and coil to attain maximum air movement and cooling

Motor

- Rated for 50 and 60 cycle application
- Standard PSC or optional Variable Speed EC (VSEC) with Orbus™ Controller

Compressor

- Wide variety of compressors including: hermetic, semi-hermetic and scroll. R-22 and R-404A/507 available for both medium and low temperature applications
- Spring-mounted compressors with vibration eliminators on all 1-1/2 to 6 HP semi-hermetic compressors; 1/2 to 1 HP compressors are rigid mounted and have a discharge loop
- Discharge service valves come standard on all units including hermetics

1/2 To 6 HP Indoor & Outdoor Condensing Units

Options

Electrical options:	Outdoor	Indoor	Stock
Adjustable low pressure control for medium temp. comp.	Option	Option	NA
Air or electric defrost timer only	Option	Option	1/2-3 HP low temp.
Beacon II™ control kits	Option	NA	NA
Crankcase heater	Standard	NA	Standard
Dual pressure control (not available on Beacon II™)	Option	Option	NA
Elec. defrost with timer & contactors (040-060 models only)	Option	Option	4-6 HP low temp.
Fixed fan cycling (2 fan units) - pressure or temperature (pressure standard on Beacon II™)	Option	Option	NA
Fused disconnect/non-fused disconnect	Option	Shipped loose	NA
Phase loss / low voltage monitor	Option	Option	NA
Smart Defrost Kit™ (Factory-Installed)	Option	Option	NA
Variable speed EC (VSEC) motors with Orbus™ controller	Option	NA	NA
Mechanical options:	Outdoor	Indoor	Stock
12" Extended legs for snowbelt operation	Shipped loose	Shipped loose	Shipped loose
Head pressure control flooding valve	Standard	Option	Standard
Liquid line drier, sight glass	Option	Option	Standard
Liquid line solenoid valve and pumpdown switch	Option	Option	NA
Low ambient kit with heated and insulated receiver, TD relay	Option	NA	NA
Oil separator with discharge line check valve (D cabinet)	Option	Option	NA
Oversize receiver (D cabinet)	Option	Option	NA
Precharged refrigerant with quick connect fittings	Option	Option	NA
Replaceable core liquid line filter (D cabinet)	Option	Option	NA
Replaceable core suction line filter (D cabinet)	Option	Option	NA
Suction accumulator	Option	Option	NA
Suction line filter	Option	Option	NA

The Beacon II™ Refrigeration System is a preassembled, factory installed refrigeration system featuring an integrated microcomputer based electronic control board.

The Beacon II™ Refrigeration System replaces the expansion valve, solenoid valve, room thermostat, defrost control and timer. It comes factory preset thereby eliminating all of the expensive and time consuming fine tuning and adjustments necessary for a good system installation. For additional information, contact your Sales Representative.

++ = See Dimensional Drawings for details

[†] = Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA for 40 feet, deduct 12 dBA for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.

[‡] Power supplied by customer. [†] Consult factory for 50 HZ applications.

Per UL and NEC, RLA values have been calculated by dividing the Maximum Continuous Current (MCC) by 1.56.

⁺⁺ = See Dimensional Drawings for details. [†] = Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA for 40 feet, deduct 12 dBA for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.

++ = See Dimensional Drawings for details.

[†] = Estimated sound pressure values are 10 feet from the unit. For estimating sound pressure from the unit at different distances, deduct the following from the unit values: 20 feet, deduct 6 dBA for 40 feet, deduct 12 dBA for 80 feet, deduct 18 dBA. This data is typical of "free field" conditions for horizontal air cooled condensing units at the outlet of the discharge air. The actual sound measurements may vary depending on the condensing unit installation. Factors such as reflecting walls, background noise and mounting conditions may have a significant influence on this data.
